

CPSC1012 – Objects Worksheet

Overview

This worksheet will demonstrate your ability to create and use objects in your programs.

Instructions

Complete the following on your own. If you would like to work with a partner, that is fine as both of you are responsible for your own work. Remember this is for learning, not a challenge simply to be completed.

Purpose

The purpose of this worksheet is to ensure that you are familiar with how to create and use arrays in your programs.

Questions

1. Create the following class:

Quiz
<ul style="list-style-type: none">- studentName: String- total: Integer- mark: Integer- weight: Integer+ StudentName: String+ Total: Integer+ Mark: Integer+ Weight: Integer
<ul style="list-style-type: none">+ Quiz(Mark: Integer, Total: Integer, Weight: Integer, StudentName: String)+ GetPercentage() : Real

The total and weight must be provided when the Quiz is created. The GetPercentage() method should return the grade of the quiz as a percentage (i.e. Total is 10 and Mark is 6, then the percentage is 60).

2. Use the Quiz class to solve the following problem.

Create a program that will allow an instructor to enter the quiz marks for a class. The instructor will need to enter quizzes into the program (use a List<T> to hold the quizzes). Once the quizzes have all been entered, display each quiz along with its percentage in a table format. Also display the average quiz grade, and average percentage (both formatted to show 2 decimal places).

Sample Program Output

Worksheet 11

Enter Quiz Total: 50

Enter Quiz Weight: 5

Enter student's name (zzz to quit): Allan

Enter student's mark: 25

Enter student's name (zzz to quit): George

Enter student's mark: 30

Enter student's name (zzz to quit): Fred

Enter student's mark: 10

Enter student's name (zzz to quit): Sally

Enter student's mark: 45

Enter student's name (zzz to quit): zzz

Class Marks

Quiz Total: 50 Quiz Weight: 5

Name	Mark	%
------	------	---

Allan	25	50
-------	----	----

George	30	60
--------	----	----

Fred	10	20
------	----	----

Sally	45	90
-------	----	----

Class Average: 27.50 = 55.00%
